Reference: Julie Schiff, Architect

To Whom This May Concern:

In the field of Plan Designers, Architects, Builders, and General Contractors, letters of recommendations are hard to come by. It seems that the expectations, deliverables, and or, promises are never followed through or kept. I met Julie Schiff from Studio Schiff while I was attempting to buy a building. Julie had done an initial design on the building and we met by coincidence.

Julie worked on a site plan approval from the City of Plantation to build a medical center for us. On the first presentation we were approved. This was the first time in many years that any designs and plans were approved by the City of Plantation on the first try. Upon hearing the accolades from the members of the city, it made me realize right then and there that she does her homework and prepares for the challenges expertly.

Julie also worked on the design of our corporate office in the city of Sunrise and she also managed the construction of the project. She selected the materials, colors, flooring, and furniture for the office and did an outstanding job. Compliments are a daily occurrence on the look and feel of our office.

If you want a professional who loves what she does and does it better than anyone I have ever worked with, then your decision is an easy one. I have never looked back and would never work with any other Architect. I look forward to my next project with Julie Schiff.

Sincerely,

A handwritten signature in blue ink, appearing to read "D. Rodriguez", is written over the typed name.
